

List of Tables and Figures

Charter 1. Introduction: Identity, Trust, and Socio-Political Contexts

Table 1. National Identity among Political Elites and Mass Publics in Poland, Central and East Europe, and West and South Europe, 2007 and 2009

Table 2. European Identity among Political Elites and Mass Publics in Poland, Central and East Europe, and West and South Europe, 2007 and 2009

Table 3. Trust in European Parliament and European Commission among Political Elites and the General Public in Poland, Central and East Europe, and West and South Europe, 2007 and 2009

Table 4. Attitudes toward the Future of the European Union among Political Elites and the General Public in Poland, Central and East Europe, and West and South Europe, 2007 and 2009

Chapter 2. National and/or European Identity: Political Elites and the Mass Public

Table 1. Components of National Identity and Their Indicators, for Parliamentarians and the General Population, Poland 2007

Table 2. Components of European Identity and Their Indicators, for Parliamentarians and the General Population, Poland 2007

Table 3. Correlations Between National Identity Components for Parliamentarians and the General Population, Poland 2007

Table 4. Correlations Between European Identity Components for Parliamentarians and the General Population, Poland 2007

Table 5. Correlations Between National Identity Components and European Identity Components for Parliamentarians and the General Population, Poland 2007

Table 6. Mean Values of the National Identity Components by Political Party Family for Parliamentarians and the General Population¹, Poland 2007

Table 7. Mean Values of the European Identity Components by Political Party Family for Parliamentarians and the General Population¹, Poland 2007

Table 8. Regression of National Identity Components on Demographics and Left-Right Scale, for Parliamentarians and the General Population, Poland 2007

Table 9. Regression of European Identity Components on Demographics and Left-Right Scale, for Parliamentarians and the General Population, Poland 2007

Table 10. Correlations Between National Identity Components and Support for European Union Integration, for Parliamentarians and the General Population

Table 11. Correlations Between European Identity Components for Parliamentarians and the General Population, Poland 2007

Appendix

Table A. Factor Analysis of the Cultural Component of National Identity for Parliamentarians and the General Population

Table B. Factor Analysis of the Cultural Component of European Identity for Parliamentarians and the General Population

Chapter 3. Do Parliamentarians' Careers Influence Their Attitudes Toward the European Union? A Comparison of the 2007 and 2009 Data

Table 1. Education, Political Position Before Parliamentary Election, Party Status, and Tenure of Polish Parliamentarians, 2007 and 2009

Table 2. Correlations of Career Characteristics of Parliamentarians, Poland 2007 and 2009

Table 3. Distribution Characteristics and Factor Loadings for Indicators of Support for Pro-EU Policies, 2007

Table 4. Distribution Characteristics and Factor Loadings for Indicators of Support for Pro-EU Policies, 2009

Table 5. Correlations of Career Characteristics of Parliamentarians with Support for pro-EU Policies Scale, Poland 2007 and 2009

Table 6. Regression of Support for Pro-EU Policies on Career Characteristics of Parliamentarians, Controlling for Gender and Age, Poland, 2007

Table 7. Regression of Support for Pro-EU Policies on Career Characteristics of Parliamentarians, Controlling for Gender and Age, Poland, 2009

Chapter 4. Aspirations for a Career in the European Union: On the Effects of Personal Experience and Professional Contacts Abroad

Table 1. Education, Knowledge of Foreign Languages, and Personal Experience of Polish Parliamentarians Abroad, 2007 and 2009

Table 2. Total Effects of Education, Knowledge of Foreign Languages, and Personal Experience Abroad on Aspirations for EU Careers Among Polish Parliamentarians, 2007 and 2009

Table 3. Regression of Knowledge of Foreign Languages on Education and Personal Experience Abroad for Polish Parliamentarians, 2007 and 2009

Table 4. Odds Ratios from Logistic Regression of Aspirations for EU Careers on Knowledge of Foreign Languages, Personal Experience Abroad, and Professional Contacts Abroad for Polish parliamentarians, 2007 and 2009

Table 5. Correlations of Aspirations of Polish Parliamentarians for EU Careers with Personal Experience Abroad and Professional Contacts Abroad for Parliamentarians in the EU Countries

Figure 1. Assumed Relationships Among the Variables Analyzed

Figure 2. Relationship Among the 2007 Variables

Figure 3. Relationship Among the Variables in 2009

Chapter 5. Trust in National and European Institutions: Is Poland an Exception?

Table 1. Averages of Trust in European Parliament (EP) and European Commission (EC) Among Elites and the General Public, 2007

Table 2. Pearson Correlation Between Trust in European Parliament and European Commission Among Elites and the General Public, 2007

Table 3. Pearson Correlation Among Trust Items, for General Public in All IntUne Countries, 2007

Table 4. Pearson Correlation Among Trust Items, for General Public in Poland, 2007

Table 5. Factor Analysis of Trust Items for General Public in All IntUne Countries, 2007

Table 6. Factor Analysis of Trust Items for Polish Sample of the General Public, 2007

Table 7. Mean Value of Trust Items for General Public in All IntUne Countries, 2007

Table 8. Mean Value of Trust Items for General Public in All IntUne Countries, 2009

Table 9. Differences in Trust of European Institutions vs. National Institutions by the General Public and Elites, 2007 and 2009

Table 10. Mean Value of Trust Items for Political Elites in All IntUne Countries, 2007

Table 11. Assessment of the Competence of European and National Decision Makers by the General Public, 2007 and 2009

Chapter 6. Identity, Trust, and Policies: Comparing the General Public and Political Elite

Table 1. Factor Loadings for National and European Identities for Polish Political Elites

Table 2. Sources of National and European Identity for the Polish General Public

Table 3. Sources of National and European Identities for Polish Political Elites

Table 4. Consequences of National and European Identity for the Polish General Public

Table 5. Consequences of National and European Identities for Polish Political Elites

Figure 1. Measurement Model of National Identity for the General Public

Figure 2. Measurement Model of European Identity for the General Public

Chapter 7. Polish Parliamentarians' Attitudes Toward Gender Equality and Gender Quotas: National and European Influences

Table 1. Measurement of European Orientation and Distribution of Its Components

Table 2. Pro-Gender Equality in the Sejm by Gender, European Orientation, European Contacts, Combinations of These, and Left–Right Political Position

Table 3. Logistic Regression of Pro-Gender Equality in the Sejm and Pro-Party Gender Quota by Selected Independent Variables

Table 4. Comparison of Pro-Gender Equality and Pro-Gender Quota Attitudes of Polish Parliamentarians from 2001 and 2007, Party Composition of the Sejm, Parties in Government with Party Gender Quota, and Percentage of Women in Sejm

Chapter 8. Perceived Immigrant Threat: On the Gender Difference Among Political Elites

Table 1. Percentage of Elites Who View Immigration from Non-EU Countries as a Threat

Table 2. Country-Level Variables

Table 3. Correlations of Immigrant Threat and Country-Level Variables

Table 4. Logistic Regression of Perceived Threat on Individual-Level Variables in Poland

Table 5. Multilevel Logistic Regression of Perceived Threat on Individual and Contextual Variables

Figure 1. Theoretical model of selection bias of elites' attitudes based on gender

Chapter 9. Opinions on the European Union Among Parliamentarians of the Major Parties and Their Electorates, 2007 and 2009

Table 1. Comparison of Law and Justice (LJ) and Civic Platform (CP) Electorates in 2007 and 2009

Table 2. Comparison of Lawmakers of LJ and CP in 2007 and 2009

Table 3. Comparison of Parliamentarians and their Electorates in 2007 and 2009

Chapter 10. Democracy, European Identity, and Trust in European Institutions: Toward Macro-Micro Explanations

Table 1. Indexes of Democracy According to Demos (IED), Economist (IEU) and CADAL (DMT) for All IntUne countries that belong to the European Union

Table 2. Distributional Characteristics of Items Indicating European Identity and Their Factor Loadings for Political Elite and the General Public, All IntUne Countries, 2007

Table 3. Means and Standard Deviations of the Scale of European Identity for Political Elite and the General Public, by Country, 2007

Table 4. Mixed Effects Models of Macro and Micro Variables Explaining European Identity in the General Public, 2007

Table 5. Distributional Characteristics of Items Indicating Trust in European Institutions and Their Factor Loadings for Political Elite and the General Public, All IntUne Countries, 2007 and 2009

Table 6. Mixed-Effects Model of Macro and Micro Variables Explaining Trust in European Institutions in the General Public, 2009

Figure 1. Average Value of the Scale of European Identity for Political Elites in the IntUne Countries Ordered on the IUE Democracy Index

Figure 2. Average Value of the Scale of European Identity for the General Public in the IntUne Countries Ordered on the IUE Democracy Index

Figure 3. Average Value of the Scale of Trust in European Institutions for the General Public in the IntUne Countries Ordered on the IUE Democracy Index

Figure 4. Exploratory Model Explaining Individual Trust in European Institutions by Macro and Micro Variables

Figure 5. Correlation Between European Identity and Trust in European Institutions for the General Public in the IntUne Countries Ordered on the IUE Democracy Index
