Jerzy PAWŁOWSKI

New taxa described from materials collected in Korean Peninsula by Polish zoological expeditions over 1885-1992

Abstract: Checklist of 222 species (or subspecies) and 15 higher taxa (belonging to 24 systematic groups of animals) is given.

Key words: Korean Peninsula, new taxa, checklist.

Author's address: Institute of Systematics and Evolution of Animals PAS, Sławkowska 17,
31-016 Kraków, POLAND

Up to now, near 240 new taxa from Korean Peninsula were described as a result of all Polish zoological expeditions realized initially by the Branicki's Museum (**B**), and later by both - Cracow (**K**) and Warsaw (**W**) - PAS Institutes. By different specializations and taxonomical preferences in the both institutions - a possibility of investigations on all main groups of animals was created. As an instance of above mentioned preferences - we can present the summarizing table of taxa new for science, as below:

groups	number of new taxa described on materials from:			
	Branicki	Cracow	Warsaw	Total
1	2	3	4	5
NEMATODA	-	-	2	2
ANNELIDA	-	1	-	1
ISOPODA	-	-	1	1
PAUROPODA	-	1	-	1
DIPLOPODA	-	-	3	3
CHILOPODA	-	-	6	6

DETAILED LIST OF NEW TAXA:

In square brackets: [locus typicus; province or region (abbreviations as in the map: see PAWŁOWSKI & TOMEK 1997)]

NEMATODA

Enchodeius repis BRZESKI, 1992 [North Korea] **W**

Geomorhystera breviseta BRZESKI, 1993 [North Korea] **W**

ANNELIDA

Branchiobdella teresae SUBCHEV, 1986 [Suyang-san; HW+K] **K**

ISOPODA

Ligidium koreanum FLASAROVÁ, 1972 [Maram; PY] **W**

PAUROPODA

Acopauropus szeptyckii RAFALSKI, 1990 [Myohyang-san; CG+M] **K**

DIPLOPODA

Anaulaciulus koreacolus JĘDRYCZKOWSKI, 1982 [Josan-ri; PY] **W**

Anaulaciulus riedeli JĘDRYCZKOWSKI, 1982 [Hyangam-ri; PY] **W**

Yamasinaium koreanum GOLOVATCH, 1981 [Myohyang-san; CG+M] **W**

CHILOPODA

Chinobius aberantus MATIC, 1973 [Myohyang-san; CG+M] **W**

Chinobius orientalis MATIC, 1973 [Myohyang-san; CG+M] **W**

Chinobius pacificus MATIC, 1973 [P'yongyang; Moran-bong; PY] **W**

Lithobius dziadoszi MATIC, 1970 [Onp'o-ri; HG] **W**

Lithobius mroczkowskii MATIC, 1970 [Onp'o-ri; HG] **W**

Lithobius riedeli MATIC, 1970 [Namp'o; YS] **W**

COLLEMBOLA

- Bothriovulsus sohungensis* WEINER & BETSCH, 1992 [Sohung-ho; HW+K] **K**

[REMARK: Bibliography of papers with descriptions of all above listed taxa is presented in two separated papers in the same volume (BAŃKOWSKA & STERZYŃSKA 1997, PAWŁOWSKI & TOMEK 1997).

STRESZCZENIE

[Tytuł: Nowe taksony opisane z materiałów zebranych na Półwyspie Koreańskim przez polskie ekspedycje zoologiczne w latach 1885–1992]

Przedstawiono wykaz 222 nowych taksonów szczebla gatunkowego (lub podgatunkowego) oraz 15 taksonów szczebla rodzajowego – opisanych przez kilkudziesięciu zoologów różnej narodowości z materiałów zebranych w czasie ekspedycji organizowanych przez Muzeum Branickich w XIX w. a następnie przez Muzeum i Instytut Zoologii PAN w Warszawie (1959–1990) oraz Instytut Systematyki i Ewolucji Zwierząt PAN w Krakowie (1971–1992). Bibliografia prac zawierających wszystkie deskrypcje została przedstawiona w dwóch

odrębnych opracowaniach opublikowanych w tym samym tomie (BAŃKOWSKA & STERZYŃSKA 1997, PAWŁOWSKI & TOMEK 1997). Odnośne kolekcje przechowywane są w obu wspomnianych Instytutach Polskiej Akademii Nauk i mogą być udostępniane do dalszych badań.
