CIVIBUS

VARSAVIENSIBUS

SECUNDUM CONCILII LIBERI CELEBRATURIS,

CIVIS.

XVIII. 1. 1277

Ignavum fucos pecus a præsepibus arcent.

Virg:

Qui novit urbem civis & incolas,
Quæ fentit, ajat. Nil temerarie
Fuci strepentes consulentum
Agmen apum impedian secundum.

Nuper cupivit Laida litiger
Præstantiorem, per vada Vistulæ
Portum, sonorosque universis
Ridicule lapides plateis.

110

Majora sanis utilioraque
Optanda non fint! Bacchus & otia
Furem scelestorumque turmas
Erudiunt populoque subdunt.

Contagiosos vellite funditus
Fontes malorum, ne rapiat cohors
Ignava, nostrorum laborum
Emolumenta sibi saginae.

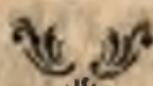

Duret tenellos jam pueros labor.
Discant puellae ducere stamina.
Siccare ne prolem feratis
Cum patre pocula ganeonum.

Non vultis ægros multiplicarier
Chironi in usum: toxica mentibus
Impune det, quicunque avarus
Stultitiam populo propinet!

Exempla pompæ splendida divitum
 Incauta sumit turba inopum sibi;
 Cum luxus annonæ aut amictus
 Artificem minimè decoret.

Industriosæ jam Berecynthia
 Tradat Minervæ munera Lechica.
 Vendamus externis beatæ
 Materiam patriæ & laborem.

Secura virtus sit: trepidet scelus
 In jus vocatum judice ab Aeaco,
 Tentata prædam ne petitam
 Jurgia suppeditent malignis.

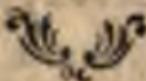

Desuescat audax litibus improbis
 A civi civis quærere gloriam,
 Umbram sequentem bella facta,
 Quæ sterilis sine re fatiscit.

Jac

C I V I B U S
Consulem sibi delecturis.

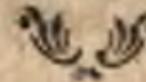

NE consulatum barbare poscito
 Tortor tuorum: ne pete turbide
 Patrone: pellax fœnerator,
 Ne cupidus patris ambi honorem.

Haud civitati carnifice est opus:
 Haud voce venali: haud propera manu
 Furti polite perpetrandi.
 O! procul, hinc procul este, pravi!

Felix fruatur consule civitas
 (Quem non libido, non tumor aut fames
 Inclinet argenti ad nefanda)
 Jura hominum penitus tuente.

Talem in senatu quærite: quaerite
 In pervetustis artificum casis.
 Virtus ministret deligendum,
 Fidere dixitiis cayete.

*vernaculam tyrannidem, quam ferunt
agricolae, dissimulanti,
carpenti exteram.*

NUm tuæ desunt patriæ tyranni?
Num miser nemo juga prisca portat;
Dum tibi in sacram venit hic tyrannis

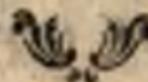

Extera mentem?

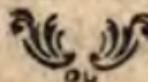

Liber est sutor coriariusque:
Libere prelum generat libellos:
Artifex multus manet & propola

Liber in urbe.

Liberos istos quis alit recentes?
Unde cerdoni corium? sophorum
Cætui vinum? status universæ
Commodus urbi?

Gentis humanæ columen perenne,
Cultor arvorum nihili putatus
Liberos nutrit, tegit atque vestit
Mancipium ipse.

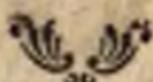

Antequam Phœbus redivivus undis
Surgit; ad crudum properat laborem
Gnavus & solers, & ad ipsa cœptum
Prandia profert

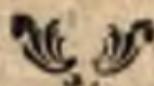

Pranso heri lictor (i) scutica feroce
Mandat & diris opus otiosus;
Delius donec caput æstuoso
Æquore condit.

(i) Podstarosci.

Tum quies bubus datur: ipse lassus
Consecrat noctem domui forendæ,
Dulcis ut conjux sobolesque fusco
Furfure vivant.

Ast herus Bacchi Venerisque servus,
Qua det, ignarus, ratione tellus
Dona mortali generi, tributa
Prodigit amens.

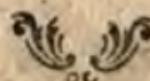

Diligit lusus epulasque lautas.
Hinc adulator, canis inde blandus
Lingit, & circum sonipes ovantem
Plurimus hinnit.

Filius turgens meritis avorum,
Sumit exemplum: cui vinolentus
Longa præceptor patris atque matris
Stemmata garrit.

Divitum dōnis inhians , placere
 Nititur pravis sophus ille pravus:
 Tempori servit : sibi consulendo ,

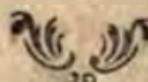

Firmat inepta.

Otiosorum genus addit astris
 Rustico (2) insultans statui , magister
 Squalido natus famulo , gerente
 Nomen īnane.

Bestias inter numerat scelestus
 Fulcra regnum , quibus absque cives
 Urbis & castrī generosa turba
 Pane careret.

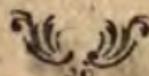

Tempus ut fallat malesanus hæres ,
 Rus patris visit. Tremefit colonus
 Aspero obtutu domini futuri:
 Accola abhorret.

(2) Utinam nomina chłop , gbur literarum magistris vilia non essent!

Vah ! sui aucturus **venerationem**,
 Præbet accessum haud facilem : tonante
 Voce se clamat nimis occupatum,

Ludicra tractans.

Hercules Caci superator inter
Fœminas vilis stata pensa duxit
Omphalæ: hic terræ (3) generoso amatæ
Stamine ludit.

Membra dum molli rapit e grabato;
Pendulam filo capit inquietus
Orbitam , de almis meriturus arvis ,
Æmulus heros.

Dexteram versus modo , nunc sinistram
Nens jacit, sursum modo nunc deorsum
Patriæ bullam , nova eo negante
Fila labore.

(3) *Orbitam a filo pendulam , qua vel in compitis ludunt otiosi , nomine Patriotka insigniunt.*

Tyro miratur stupidus peritam
Dexteram: blandi socii celebrant:
Laude barbatus vehementer sartor

Donat apella.

Jamque cincinnos fruit hic heriles:
Ille jentacum dat hero, iste vestem.
Pasto & ornato venit ardor, omni
Currere villa.

Bellulus præbet sonipes ovanti
Terga sessori, crepitante putrem
Ungula terram quatiens, Lycisca
Usque latrante.

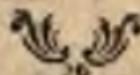

Pulveris crassi saturum remittit
Ad Iares tandem patrios anhelus
Ac madens. Heros, faciem lavatus,
Prandia poscit.

Prædicat veseens, (sociique plaudunt)
 Ut puer ludens triviis, anusque
 Tristis, ad flagri dederint fragorem,
 Terga parentes.

Rusticos vultus, rigidos amictus,
 Squalidum callum manuum, cibosque
 Voce vulgares levis otiator

Carpit herili.

Temporum ignarus, vocat impudentis
 Reprobam (4) Chami sobolem colonos,
 Esse se jactans dominum: sua esse
 Mancipia illos.

Immemor, Bacchi Cererisque dona
 Rusticis primum manibus venire:
 Tum gulæ gentes per eas herili
 Cedere fuesse;

(4) *Agricolas passim per contemptum Chamos vocant.*

Orbus a sensu puer, æmulator
 Patrius, patrem superans furore, &
 Pro laborantum meritis cachinnum
 Solvit iniquus.

Ire venatum juvat & virtente
 Currere in campo: canum odora turma
 Spem colonorum segetes, equinaque
 Ungula sternit.

Dum phalanx sudat quadrupes bipesque,
 Unicum cursu leporem fatigans;
 Hospites duros vetus ille ruris
 Incola ludit.

Nunc per abstrusas volitat salebras:
 Nunc petit dumos sua lustra: nunc se
 Vertit auritus rediens in agros,
 Prælia doctus.

Sauciant spinæ canum equumque plantas.
 Pulveris ~~faedet~~ bibiti , atque summis
 Montibus lapsæ repetenda suadent
 Tecta tenebræ.

Rura cultores populata plorant.
 Candidus quidam venerandus annis ,
 Admonens culpæ juvenem , potente
 Fuste feritur.

Integri lædit proba disciplina
 Rustici , corruptum alio magistro.
 Doctor aës mendax tulit ante : fert nunc
 Verbera verax.

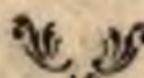

Odit agrestes operas tyrannus ,
 Odit & vitam leporis vagantis ,
 Oreque ac gestu simul huic & illis
 Dira minatur.

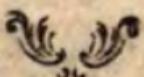

Libere auritus fugiet, vel arte
 Ludet ignaros pueros canesque:
 Simplices fixosque manent colonos
 Flagra famesque.

Cœna mox segnem recreat catervam,
 Et pavimentum madet ipsum Jaccho.
 Lauta hero præbens, fruitur nigello
 Pane colonus.

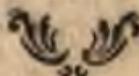

Tune sic pressos vocitabis audax
 Liberos? Vili studio tyrannos
 Tu teges nostros, juga tanta dicens
 Jura, poeta?

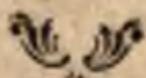

Quin magistellos opulentiorum
 Admone, mentes teneras amore
 Imbuant gentis, sine qua perit
 Comptulus omnis.

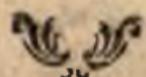

Exuet nato genitor monente
Integri crudele odium coloni;
Dum tuo doctor monitu juventæ
Suaserit apta.

Quid Paphum prodest Venerisque nosse
Templa? Callosi videat Camilli
Vomerem, duros videat Catonis
Tyro labores.

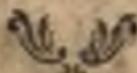

Nos pater mundi sapiens creavit
Unicum tantum genus: esse fratres
Gestiens, sese famulos herosque
Jussit amare.

Quos pecus dicunt hebes, ebriosum;
Ultro heri reddunt hebetes, bibaces;
Ut notatorum ruidiumque sint im-
pune tyranni.

Obvenit passim agricolis iniquus
Doctor hebraeus, scholaque in popina est:
Semper astutus docuit redemptor (5)

Pessima vernas.

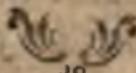

Sæpe libertus sapuit Quiritum.
Rusticus cur non sepiat polonus;
Liberum si quid poliat fidelis

Cura magistri.

Rex amat sanctos, amat & senator
Ac eques quidam solidus colonos.
Cur laborantum, generosa turba,

Millia vexet?

Sentiat fratum laerymas, Getarum
Cors avarorum: strepito tyrannis
Sarmatis, vates: peregrina noli

Carpere regna.

(5) Arendarz.

Varsaviae prelo M. J. K. Durduano 1792.
