ISBN 83-00-02543-X

CONTENTS

Preface	5
Mirosław BEREZIŃSKI, Grażyna PETRICZEK: A new look at the problem of macroeconomic system evolution....	7
Hanna BURY, Lech KRUSZ, Roman KULIKOWSKI: Supporting planning decisions by experiments with a complex development model.....	29
Christer CARLSSON: Information technology for senior level management support	45
Christer CARLSSON, Ralf ÖSTERMARK: Interactive heuristics vs. optimization as planning strategies.....	67
Wiesław CIECHANOWICZ, Elżbieta MARCINIAK: Estimating the consequence of introducing wind energy and biomass energy to the energy sector	85
Janusz KACPRZYK, Jerzy HOŁUBIEC: Towards more realistic modeling of international economic cooperation via fuzzy mathematical programming and cooperative games.....	96
Leszek KLUKOWSKI, Oariusz WAGNER: Uncertainty in the analytic hierarchy process.....	106
Lech KRUSZ, Bożena ŁOPUCH, Piotr BRONISZ: Application of interactive solutions for decision support in bargaining problem, an illustrative example.....	121
Janusz MAJCHRZAK: A new approach for pairwise comparisons utilization in MCDM	141
Marko M. MÄKELÄ: Numerical experiments with various nonsmooth optimization methods	148
Jacek W. MERCIK: On the entry problem	166
Hannu NURMI, Janusz KACPRZYK: Fuzzy tournaments and their solution concepts in group decision making	174

Jan OWSIŃSKI, Sławomir ZADROŻNY: A decision support system for analysing and aggregating fuzzy orderings	184
Tapio REPONEN, Timo LEINO: Expert system for information technology strategy formulation in whole sale business	201
Leon SŁOMIŃSKI: Parallel algorithms for optimization	219
Andrzej STACHURSKI: A variant of Karmarkar algorithm for LP problems making use of sensitivity analysis	234
Jacek STEFAŃSKI: Some aspects of the use of threats in negotiations	243
Andrzej STRASZAK, Wojciech CICHOCKI, Andrzej JAKUBOWSKI, Dariusz WAGNER: Decision support systems for multi-actor negotiations within enterprises and research organisations	254
Reima SUOMI: Inter-organizational information systems in the light of the transaction cost theory	285
Krzysztof SZKATUŁA: A greedy-like approximate algorithm for the sequencing jobs with deadlines problem: an average case approach	299
Jeffrey E. TEICH, Markku KUULA: Nadir ordinal ranking approach (NORA)	313
Aimo A. TÖRN: Parallel Monte Carlo with application to global optimization	329
