

Table with columns 1-24 and rows 10.7.44-18. Each cell contains numerical data, often with a small number below it. The data represents temperature readings over time.

Kytkentemporaatien Suikisaali 1944

Table with 29 columns and 29 rows of numerical data. Headers include 1 through 29. The data consists of various numerical values, some with negative signs, arranged in a grid-like structure.

Table with columns 1-24 and rows 1-30. Each cell contains numerical data, likely meteorological measurements, with some handwritten annotations and corrections.
