#### Sztuczna komora

Analiza ultrastrukturalna kardiomiocytów wykazała obecność mitochondriów z cechami obrzęku i pozbawionych grzebieni (Fig. 1,2,3). W macierzy mitochondrialnej niektórych mitochondriów obecne były owalne struktury i ciała mielinopodobne (Fig. 4,5).

#### Artificial ventricle

Electronmicroscopy analysis of cardiomyocytes revealed the presence swollen mitochondria devoid of cristae (Figs. 1-3). In the matrix of some mitochondria oval structures and myelin-like bodies were seen (Figs. 4,5).
