

## LIST OF PAPERS

### Keynote Lectures

Phase - Field Modeling of Dendritic Growth with Convection <i>Ch. Beckermann, X. Tong, A. Karma</i> .....	9
Melting in Enclosures: Coupled Heat Transfer and Natural Convection <i>D. Gobin, P. Le Quééré</i> .....	13
Solidification and Melting in Microgravity <i>E. Leonardi</i> .....	19
Existence of Solutions to a Phase Field Model for the Isothermal Solidification Process of a Binary Alloy <i>J. Rappaz, J.F. Scheid</i> .....	27
Some Interfaces between Theory and Experiment <i>D. S. Riley</i> .....	31

### Contributed Papers

Simulation of Convection Effects on Dendritic Growth <i>G. Amberg, R. Tönhardt</i> .....	33
Numerical Approaches to Solving the Direct and Inverse Problems of Electromagneto- elasticity <i>A. V. Avdeev, O. N. Soboleva, V. I. Priimenko</i> .....	37
Numerical Simulation of a Semiconductor Floating Zone <i>E. Bänsch, B. Höhn</i> .....	41
FEM Analysis of Alloy Solidification using the Anisotropic Porous Medium Model of the Mushy Zone <i>J. Banaszek, P. Furmański</i> .....	45
The Problem of Authenticity of Initial and Thermal Boundary Conditions in the Code Validation Analysis <i>J. Banaszek, M. Rebow</i> .....	47
A Generalization of the Navier-Stokes Equations to Two-Phase Flows <i>T. Blesgen</i> .....	49
Spreading with Basal Solidification <i>M. Bunk, P. Ehrhard</i> .....	53

A Numerical Method for the Resolution of Two-Phase Flows and Application to a Vertical Heated Pipe <i>F. Coquel, E. Godlewski, A. In, B. Perthame, P. Rasle</i> .....	57
Numerical Simulation of Frontal Polymerization <i>T. Dumont</i> .....	61
Identification of a Moving Solid/Liquid Interface <i>A. El Badia</i> .....	65
2D Numerical Simulation of Gas - Liquid Type Phase Transition for Molecules in Ceramics <i>V. Frishfelds, I. Madzhulis, J. Rimshans</i> .....	71
Mathematical Modeling of Transport Phenomena During Solidification of Binary Systems using the Ensemble Averaging Approach <i>P. Furmański</i> .....	75
High-Azimuthal Number Axisymmetry - Breaking Convective Instabilities in Axisymmetric Freezing of Ice <i>A. Yu. Gelfgat, P. Z. Bar-Yoseph, A. Solan, T. A. Kowalewski</i> .....	77
Numerical and Physical Modelling of the Effect of Different Configurations of Rotating Magnetic Fields on Hydrodynamics and Crystallisation Front in a Cylindrical Volume <i>Yu.M. Gelfgat</i> .....	81
Numerical Simulation of the Single Crystal Growth Process <i>V. P. Ginkin</i> .....	85
Solidification of a Paraffin within a Tall Enclosure <i>J. Gościk</i> .....	87
Stress Problems in Liquid Bridge Thermocapillary Convection: a Numerical Approach <i>G. Kasperski, G. Labrosse</i> .....	91
Contribution to Optimization of Continuous Casting of Steel Semiproducts <i>F. Kavička, K. Stránský, J. Štětina, P. Ramík, B. Sekanina, V. Dobrovská, J. Dobrovská</i> .....	93
Liquid-Vapour Travelling Waves by a Kinetic Model of van der Waals Fluids <i>B. Kaźmierczak, K. Piechór</i> .....	97
Generalized Integral Forms of Wall Friction, Heat and Mass Transfer Factors for Drift Flux Model of Two-Phase Flow in Axisymmetrical Channels <i>Yu. N. Kornienko, E.V. Kornienko</i> .....	105
Experimental Validation of Temperature and Velocity Fields for the Freezing Water <i>T. A. Kowalewski, A. Cybulski, M. Rebow</i> .....	109

Analysis of Free Surface Flows with Solidification <i>A. Kuznetsov</i> .....	115
Finite Element Analysis of Melting Driven by Buoyancy and Surface Tension Forces <i>M. Medale, M. Jaeger, A. Kaiss</i> .....	119
Comparison of Upwind and Characteristic Schemes for Solving Multiphase Diffusion- Convection Equation <i>J. Pieska, E. Laitinen</i> .....	123
A Note on Possible Flow Instabilities in Melting from the Side <i>P. Le Quééré, D. Gobin</i> .....	129
Convergence of Phase-Field Equations to the Stefan Model <i>G. Schimperna</i> .....	131
Error Control of Frémond Models of Shape Memory Alloys <i>U. Stefanelli</i> .....	135
The Entrainment of Flux into the Lubrication Gap in Continuous Casting of Steel <i>H. Steinrück</i> .....	139
Natural Convection During Ice Formation: Numerical Simulation vs. Experimental Results <i>F. Stella, M. Giangi, T.A. Kowalewski</i> .....	141
Y Distribution in Ba-Cu-O Melt During Growth of Superconducting Material Y123 by Czochralski Method <i>J. S. Szmyd, K. Gajek, K. Suzuki</i> .....	147
Effects of Thermal Conductivities on Heat and Mass Transfer During Directional Solidification <i>V. Timchenko, M. El Ganaoui, E. Leonardi, P. Bontoux, G. de Vahl Davis</i> .....	151
An Asymptotic Solution for the Dissolution of Particles in Multi-Component Alloys <i>F. Vermolen, K. Vuik, S. van der Zwaag</i> .....	155
Modelling and Results in Fluidynamics of Crystal Growth from the Vapour Phase <i>A. Viviani, C. Golia</i> .....	161
Unsteady Three-Dimensional Melt Flow Computation of Czochralski Single Crystal Growth of Super-Conducting Material <i>T. Yamauchi, G. Mika, J. Szmyd, K. Suzuki</i> .....	163
